## PROFILE

I am a focused individual who is pursuing a career as a UI Engineer. With my strong work ethics and ability to learn new skills, I am confident in fulfilling the hiring role. Over my time in learning how to code, I have discovered a passion in building user interfaces along with providing a friendly and interactive user experience. I began my learning journey on Codecademy.com to learn basic HTML, CSS, and Javascript. Once I solidified the basics, I moved onto building projects on Frontend Mentor. I grew confidence in my skills and dove deep into learning React and Next.js on Udemy.com. I am driven to contribute towards success through extraordinary determination, excellent communication skills, vigorous attention to detail, intense sense of urgency, along with precise organizational skills. My past experiences have thought me an endless amount of problem solving, critical thinking, and the ability to multitask/plan/organize/control daily operations. I aspire to work cooperatively with an outstanding team, to set and accomplish goals, while mastering our craft each and every day. I am eager to learn new skills, fully capable in completing assigned tasks and always thinking the bigger picture. I would greatly appreciate any feedback in what I can do to be a part of the team. With my experience in building modern UI, I am seeking a full-time opportunity to continue growing as a developer.

## EXPERIENCE

### 3Based, Frontend Developer Internship

- Lead the UI development on current projects by following along to Figma files with an addition to my own creative ideas.
- Developed using React, Tailwind CSS, and Framer Motion to enhance functionality and user experience.
- Create fully responsive sites focusing on the Mobile-First approach.
- Coordinate closely with other developers about our findings and insights when solving a complex coding challenge.
- Maintain and organized codebase file structure for reusability in future projects.
- Learnt different approaches on how to view certain challenges from senior developers.

## **Four Seasons Hotel at The Surf Club, Pool and Beach Assistant Manager April 2018 - March 2020**

- Lead the supervision of the Pool and Beach team by conducting daily shift lineups and actively checking with team members through out the daily operation.
- Handled any guest or resident inconvenience with professional communication skills by actively listening and following up on the situation, ensuring that the guest or resident is satisfied.
- Coordinated with other departments throughout the daily operation by consistently being present in all public areas and using our radio system. Assisting any department if needed.
- Created work schedules and daily floor plan layout by closely following our In-House occupancy and with strategic planning and organization skills

## **EDUCATION**

- Miami Dade College - Business Admin AA 2016
- Codecademy Web Development Career Course
- Udemy Academind React Certificate
- Udemy Academind Next.js Certificate

## **SKILLS**

HTML / CSS / SASS / TAILWIND CSS / JS / REACT / NEXT.JS / FRAMER MOTION / MONGODB / NEXT-AUTH / GIT

## **PROJECTS**

**Blogr** - My first website that I have ever built! A front end mentor landing page challenge focusing on HTML and CSS. The only JS needed was for the mobile menu!

<https://blogr-frontend-fm.vercel.app/>

**Coffee Roasters** - A front end mentor landing page for a mock coffee subscription. Users select their coffee order and get notified with an order modal. Built with HTML, CSS and JS.

<https://coffeeroasters-fem.vercel.app/>

**My Team** - A front end mentor landing page built on HTML, CSS and JS.

<https://myteam-fem.vercel.app/>

**PayAPI** - A front end mentor landing page built on HTML, CSS and JS.

<https://payapi-fem-ten.vercel.app/>

**The Planets** - A front end mentor landing page built with HTML, CSS, and JS. Users are able to view facts about the 8 planets.

<https://planets-fem.vercel.app/>

**Clock App** - A front end mentor landing page built with React. App is calling to an API to fetch the users local time zone along with a generated quote.

<https://clockapp-fem.vercel.app/>

**Designo App** - A front end mentor landing page built with React.

<https://designo-app.vercel.app/>

**Audiophile E-commerce App** - A frontend mentor landing page built with React. Users are able to add items to cart and checkout items. Items are stored to local storage.

<https://audiophile-app.vercel.app/>

**Demelo Dining** - A landing page site built with React for Demelo Dining, a private and catering dining company. Users are able to contact the company with inquires with emails being sent directly to the Chef Owner.

<https://www.demelodining.com/>

**3Based**- A landing page site built with React for 3Based Co. A company building on Cardano.

TBA-

**3Based/Based Bears** - A landing page site for 3Based first CNFT project, Based Bears.

TBA-

**Product Feedback App** - A front end mentor web app challenge built with React. Users are able to sign up by sending data to MongoDB. Users are able to login in with the help of Next-Auth. Users are able to view feedback suggestions and update the status of feedback requests.
