

Egor Guscha

SENIOR SOFTWARE ENGINEER

Mob: +375 29 37-37-303

Email: forcejmage@gmail.com

LinkedIn: <https://www.linkedin.com/in/egor-gushcha>

WORK BACKGROUND

Software Engineer (Senior)

TWINSLASH

06/2021 - present

Achievements/Tasks:

- Migrate all code base from MUI4 to MUI5
- Setup project config: formatting, building, envs
- Setup AWS S3 bucket with Cloudflare to avoid duplicating assets between several apps
- Reduction in first load js with nextjs on ~35%
- Re-create auth approach what reduce a lot of requests to backend hence
- Setup CI/CD pipeline using github actions
- In short time finished critical feature what made it possible to get next investment round

Projects:

Fixefy - AI automation platform for supply chain reconciliations boosts supply chain teams with deep insight from endless data points scattered across their operations. Details under the NDA.

Software Engineer (Strong Middle)

REDNAVIS

09/2019 - 06/2020

Achievements/Tasks:

- In short term implemented UI configurator based on DnD what greatly accelerated the release of the demo
- Built project from scratch using AtomicDesign and Feature Sliced approach, what allowed new developers understand the code base
- Created chrome extension for analytics requested from the customer

Projects:

1. Automation Hero. Robin

Attended automations are delivered via Robin for easier adoption and customization. Robin also serves as a human-AI feedback loop to continuously improve business processes.

2. Automation Hero. Flow Studio

Flow Studio empowers developers to design intelligent solutions to the challenges they face every day, without writing a single line of code.

Software Engineer (Middle)

FREELANCE

04/2017 - 08/2019

Achievements/Tasks:

- Project development from scratch
- Stylization of application components, support for displays of different resolutions
- Planning and execution of iterative refactoring, without disrupting system performance
- Support, updating, writing documentation
- Tasks completion in a timely manner
- Development of new functionality, using new practices Control of updating of used libraries

EDUCATION

Gomel State Technical University named after BY. Sukhoi

BACHELOR, 2019

All coding skills were learnt from courses and self learning

HARD SKILLS

Skills

JavaScript/TypeScript, HTML, CSS(Flex, Grid), React(a lot of react libraries MUI, emotion, styled-components and etc), effector(core team member), redux, redux-saga/thunk, nodejs, AWS, github actions, cloudflare, serverless, GraphQL, Apollo, Express, Koa, jest,enzyme, chai, mocha, webpack, vite, parcel, nextjs

Languages

Russian — Native

English — B1, Professional Working Proficiency

ADDITIONAL INFORMATION

I have 4+ years of experience in web development. I'm currently working as a front-end engineer and periodically backend. Apart from that, I managed large developer teams (20+ people). I was responsible for the UI architecture, optimization of apps, testing, building, front-ops, and DevOps. My experience includes:

- Developing complex web applications with frequently changeable requirements.
- Building from the scratch apps like AgGrid with additional functionality.
- Elaborating dashboards for FinTech projects.

From the backend, I have experience in building projects on AWS.

I fully dedicate myself to the project and precisely analyze its processes because my further actions are based on the analysis results. Building state-of-the-art, easy-to-use, user-friendly web applications are genuinely my passion, and I am lucky I have discovered my dream job at such an early stage of life. Currently, I'm working on my private project, open-source(effector), besides being interested in technologies, UI/UX, best practices, and reading the libs code to know how it works.

REFERENCES

LORENC ESTREFI (JUNE 2020, DIRECT MANAGER)

SENIOR SOFTWARE ENGINEER at MISTER SPEX

Rarely in my career I've met someone like Egor, he is smart and efficient.

I worked with him for several months and he was always able to address issues and come up with ideas.

If he keeps going like this any company will be happy to have him.

He is for sure a rare talent.

ARTHUR K. (MAY 2020, TEAM MEMBERS)

CHIEF TECHNOLOGY OFFICER at AUTOMATION HERO INC

Egor is a good engineer with a hands-on experience in designing and creating a highly loaded Front-end applications.

Great team player with a good understanding of the Agile methodologies.

So if you are looking for a really good engineer I would strongly recommend him.
