## WORK EXPERIENCE

---

**Akiles - akiles.app** November 2018 - Present  
*Full Stack Lead & Growth Hacker (full-time)* *Barcelona*

- Develop several VueJS projects from scratch to large scale with a monorepo architecture.
- Design and develop an entire custom UI kit from the ground-up.
- Develop an offline ready PWA, and cordova app that shares most of the web code.
- Gitlab CI and k8s as a continuous delivery workflow.
- Stripe custom payments flow (card & sepa debit).
- Design, copywriting, adwords, datastudio, tagmanager & SEO

**Digital Audits - audits.digital, gendant.com** January 2021 - Present  
*Fullstack + Marketing (freelance)* *Barcelona*

- Website creation, setup, copywriting, UX & marketing.

**Siber Zone - app** December 2019 - Present  
*Front End (freelance)* *Barcelona*

- Develop a Cordova VueJS app (ios/android) to control ventilation systems through modbus TCP protocol.

**Shalion** March 2021 - June 2022  
*Front End (freelance)* *Barcelona*

- Develop a chrome extension in order to help operations team to pick crawling xpaths.
- Develop a React admin panel with a common REST CRUD and a python code editor with a JS python interpreter.

**Netquest** November 2015 - July 2018  
*Senior Front End Engineer* *Barcelona*

- Develop several React (v14 to v16) projects from scratch to large scale.
- Design unit&acceptance tests; enzyme for unit tests and webdriverio for user acceptance tests.
- Use polyfills & polyfill.io to support rare browsers (ie9+, 320px mobile, full hd).
- Focus on architecture, security and code quality.
- Team mentoring & training.

**Inbenta** April 2015 - November 2015  
*Full-Stack developer*

Get technical requirements from non-technical stakeholders and transform them into mock-ups and chatbots displayed onto client legacy websites by crossdomain integrations subjected to client security policies.

**nomorecode - co-founder** October 2013 - April 2015  
*Full-Stack developer*

I played several roles on Nomorecode but basically Product Owner and Front end developer within a 4 people team that made an IOT platform from scratch, that can fetch, save, display and automate building heating, cooling and lighting systems on Dektop Ipad & Smartphone devices.

**Xpresa Corporation, SL** April 2012 - October 2013  
*Full Stack Developer* *Terrassa, Barcelona*

As a full-stack developer I led the following projects:

Geoscan - *October 2012 - January 2013*  
Navigation tool that used a robotic total station to georeference radar streams.

SGClima - *April 2012 - January 2013*  
Cloud platform that monitored and controlled heating and cooling systems in real time, allowing users to configure alerts, query historical data, generate periodical reports, generate dashboards via drag drop, etc.

**Fuildra, SA** March 2011 - September 2011  
*Scholar at Masterdata department* *Granollers, Barcelona*

Independently developed an utility for checking and merging large group databases.

## EDUCATION

---

**UAB, Bellaterra** Coursing  
*B.S. in Computer Science Engineering* *4.5/5*

**Active consciousness, Tantra & Neotantra** Coursing

**Entrepreneurship course, Euncet Business School** 2014

**CCNA, Cisco Systems** 2006
