Intermediate knowledge : machine learning, Data analysis, market research analysis, tokenomics analysis, BNB chain, Polygon Chain, Ethereum chain

RELEVANT EXPERIENCE

05/2022-08/2022 Catheon Gaming
***Remote* Community lead**

Job performed: I was the face of the team, leading a group of 15 moderators in organizing many events and collaborations for the community in Discord and Twitter. I also led the outreach team's efforts to market our product in the news, on influencers' socials, on other projects' community servers, on NFT calendars, and in forums. We also had daily meetings where we discussed strategy with the entire marketing team and assigned various tasks for the coming days.

08/2022 – Present MK2, Karmaverse, Voyage In Paradise
***Remote* Community moderator & Collaboration manager**

Job performed: I took care of the community management from the start of the bear market in 2022, taking care of answering questions related to the project in the chat, solving tickets, posting regularly in Discord, livestreaming talking about and playing the game of the project, and organizing incoming activities for the community. As a collaboration manager, I reached out to many other projects looking for collaborations and proposed the collaboration that was right for each project's community.

2020-Present Youtube
***Remote* Content Creator**

Job performed: I have two active Youtube channels with topics about my experience in my university and financial information (cryptocurrency-related videos too), and that's where I found my passion about building a community.

NON-RELEVANT EXPERIENCE (not-crypto-related)

2016 – 2018 **Independent worker**
Lima – Peru **Private Teacher in mathematics, physics and chemistry**

Job performed: I was a teacher who helped various students in school, pre university and university level to achieve their goals such as entering their university or get better grades.

12/2018 – 03/2019 **Company : Mount Snow**
Vermont – E.E.U.U **Housekeeper**

Job performed: I was a housekeeper during my university vacations in the program Work and Travel, which helped me improve my team work skills.

03/2019 - Presente **Student group CMMSB**
Lima - Peru **Active Member**

Job performed: I am currently an active member of CMMSB in the mining software development group, obtaining the first place in CONEIMIN 2019 in the hackotek contest which is based on innovation in mining with a 3D fleet management system.

01/2020 – 05/2022 **Company : Minesense**
Lima - Peru **Data analyst**

Job performed: I was working in the R&D and operations area in very diverse activities such as monitoring an implementation of a new product for a mine (confidential) and I also did a lot of data analysis tasks looking at parameters like the brakes of a truck, mineral weight inside a truck and some more for better decision making

SKILLS AND INTERESTS

I describe myself as someone with big aspirations who is persevering, friendly, patient, understanding, and has good leadership skills. I am good at decision-making and project development, and I perform well in various types of environments regardless of the presence of pressure.

Since I was very young, I've been inspired by innovations in technology. I began interacting with the internet when I was 8 ; then I followed with programming and machine learning, and I am currently inspired by blockchain innovation. I am interested in strategic planning, finance, human resources, automation, decentralized systems, and the latest innovations in technology.
